## Block diagram :-

## state diagram :-

Present state			Next state			Input			
Q	Q <sub>0</sub>	A	name	Q <sub>1</sub>	Q <sub>0</sub>	B	J <sub>1</sub>	K <sub>1</sub>	J <sub>0</sub> K <sub>0</sub>
0	0	0	W	0	0	0	0	X	0 X
0	0	1	X	0	1	0	0	X	1 X
0	1	0	X	0	1	0	0	X	X 0
0	1	1	Y	1	0	0	1	X	X 1
1	0	0	Y	1	0	0	X	0	0 X
1	0	1	<del>Z</del>	1	1	0	X	0	1 X
1	1	0	<del>W</del>	1	1	0	X	0	X 0
1	1	1	W	0	0	1	X	1	X 1

Explain the functionality of the FSM

Step 1 :-

In first step the machine (vending machine) will show the insert the coin to required.

Step 2 :-

And initializing the coin which is required one or not. then

Step 3 :- Transitions

- \* Insert coin 5 then it will remain same state and also asking additional coins to get.

- \* Insert coin 10 then it will move to another state and dispensing if the required amount reached.

- \* Insert coin 20 it will move to another state and dispensing if the required amount reached.

- \* Insert coin 50, In this state also remain same as coin 20, this process is repeatedly occurs until we get.

Step 4 :-

- if the dispensing successful, state change given. and if the product not available or any issue occurs, transition back idle.

Step 5 :- BACK amount

BACK amount is given when we give more amount than required one.

~~Step 6 :-~~
